

Book 1

Defining Data Science

Contents at a Glance

Chapter 1: Considering the History and Uses of Data Science

Considering the Elements of Data Science

Defining the Role of Data in the World

Creating the Data Science Pipeline

Comparing Different Languages Used for Data Science

Learning to Perform Data Science Tasks Fast

Chapter 2: Placing Data Science within the Realm of AI

Seeing the Data to Data Science Relationship

Defining the Levels of AI

Creating a Pipeline from Data to AI

Chapter 3: Creating a Data Science Lab of Your Own

Considering the Analysis Platform Options

Choosing a Development Language

Obtaining and Using Python

Obtaining and Using R

Presenting Frameworks

Accessing the Downloadable Code

Chapter 4: Considering Additional Packages and Libraries You Might Want

Considering the Uses for Third-Party Code

Obtaining Useful Python Packages

Locating Useful R Libraries

Chapter 5: Leveraging a Deep Learning Framework

Understanding Deep Learning Framework Usage

Working with Low-End Frameworks

Understanding TensorFlow
