

Book 4

Performing Advanced Data Manipulation

Contents at a Glance

Chapter 1: Leveraging Ensembles of Learners

Leveraging Decision Trees

Working with Almost Random Guesses

Meeting Again with Gradient Descent

Averaging Different Predictors

Chapter 2: Building Deep Learning Models

Discovering the Incredible Perceptron

Hitting Complexity with Neural Networks

Understanding More about Neural Networks

Looking Under the Hood of Neural Networks

Explaining Deep Learning Differences with Other Forms of AI

Chapter 3: Recognizing Images with CNNs

Beginning with Simple Image Recognition

Understanding CNN Image Basics

Moving to CNNs with Character Recognition

Explaining How Convolutions Work

Detecting Edges and Shapes from Images

Chapter 4: Processing Text and Other Sequences

Introducing Natural Language Processing

Understanding How Machines Read

Understanding Semantics Using Word Embeddings

[Using Scoring and Classification](#)
