

Content

1. [Preface](#)
 1. [Who this book is for](#)
 2. [What this book covers](#)
 3. [A note on skills required](#)
 4. [To get the most out of this book](#)
 1. [Complete the extras](#)
 2. [Download the example code files](#)
 5. [Conventions used](#)
 6. [Get in touch](#)
 7. [Share your thoughts](#)
 8. [Download a free PDF copy of this book](#)
2. [Chapter 1: Project Zero: A Template for Other Projects](#)
 1. [1.1 On quality](#)
 1. [1.1.1 More Reading on Quality](#)
 2. [1.2 Suggested project sprints](#)
 1. [1.2.1 Inception](#)
 2. [1.2.2 Elaboration, part 1: define done](#)
 3. [1.2.3 Elaboration, part 2: define components and tests](#)
 4. [1.2.4 Construction](#)
 5. [1.2.5 Transition](#)
 3. [1.3 List of deliverables](#)
 4. [1.4 Development tool installation](#)
 5. [1.5 Project 0 – Hello World with test cases](#)
 1. [1.5.1 Description](#)
 2. [1.5.2 Approach](#)
 3. [1.5.3 Deliverables](#)
 4. [1.5.4 Definition of done](#)

6. [1.6 Summary](#)
7. [1.7 Extras](#)
 1. [1.7.1 Static analysis - mypy, flake8](#)
 2. [1.7.2 CLI features](#)
 3. [1.7.3 Logging](#)
 4. [1.7.4 Cookiecutter](#)
3. [Chapter 2: Overview of the Projects](#)
 1. [2.1 General data acquisition](#)
 2. [2.2 Acquisition via Extract](#)
 3. [2.3 Inspection](#)
 4. [2.4 Clean, validate, standardize, and persist](#)
 5. [2.5 Summarize and analyze](#)
 6. [2.6 Statistical modeling](#)
 7. [2.7 Data contracts](#)
 8. [2.8 Summary](#)
4. [Chapter 3: Project 1.1: Data Acquisition Base Application](#)
 1. [3.1 Description](#)
 1. [3.1.1 User experience](#)
 2. [3.1.2 About the source data](#)
 3. [3.1.3 About the output data](#)
 2. [3.2 Architectural approach](#)
 1. [3.2.1 Class design](#)
 2. [3.2.2 Design principles](#)
 3. [3.2.3 Functional design](#)
 3. [3.3 Deliverables](#)
 1. [3.3.1 Acceptance tests](#)
 2. [3.3.2 Additional acceptance scenarios](#)
 3. [3.3.3 Unit tests](#)
 4. [3.4 Summary](#)
 5. [3.5 Extras](#)
 1. [3.5.1 Logging enhancements](#)
 2. [3.5.2 Configuration extensions](#)
 3. [3.5.3 Data subsets](#)
 4. [3.5.4 Another example data source](#)
5. [Chapter 4: Data Acquisition Features: Web APIs and Scraping](#)

1. [4.1 Project 1.2: Acquire data from a web service](#)
 1. [4.1.1 Description](#)
 2. [4.1.2 Approach](#)
 3. [4.1.3 Deliverables](#)
2. [4.2 Project 1.3: Scrape data from a web page](#)
 1. [4.2.1 Description](#)
 2. [4.2.2 About the source data](#)
 3. [4.2.3 Approach](#)
 4. [4.2.4 Deliverables](#)
3. [4.3 Summary](#)
4. [4.4 Extras](#)
 1. [4.4.1 Locate more JSON-format data](#)
 2. [4.4.2 Other data sets to extract](#)
 3. [4.4.3 Handling schema variations](#)
 4. [4.4.4 CLI enhancements](#)
 5. [4.4.5 Logging](#)
6. [Chapter 5: Data Acquisition Features: SQL Database](#)
 1. [5.1 Project 1.4: A local SQL database](#)
 1. [5.1.1 Description](#)
 2. [5.1.2 Approach](#)
 3. [5.1.3 Deliverables](#)
 2. [5.2 Project 1.5: Acquire data from a SQL extract](#)
 1. [5.2.1 Description](#)
 2. [5.2.2 The Object-Relational Mapping \(ORM\) problem](#)
 3. [5.2.3 About the source data](#)
 4. [5.2.4 Approach](#)
 5. [5.2.5 Deliverables](#)
 3. [5.3 Summary](#)
 4. [5.4 Extras](#)
 1. [5.4.1 Consider using another database](#)
 2. [5.4.2 Consider using a NoSQL database](#)
 3. [5.4.3 Consider using SQLAlchemy to define an ORM layer](#)
7. [Chapter 6: Project 2.1: Data Inspection Notebook](#)
 1. [6.1 Description](#)
 1. [6.1.1 About the source data](#)

2. **6.2 Approach**
 1. **6.2.1 Notebook test cases for the functions**
 2. **6.2.2 Common code in a separate module**
3. **6.3 Deliverables**
 1. **6.3.1 Notebook .ipynb file**
 2. **6.3.2 Executing a notebook's test suite**
4. **6.4 Summary**
5. **6.5 Extras**
 1. **6.5.1 Use pandas to examine data**
8. **Chapter 7: Data Inspection Features**
 1. **7.1 Project 2.2: Validating cardinal domains — measures, counts, and durations**
 2. **7.1.1 Description**
 3. **7.1.2 Approach**
 4. **7.1.3 Deliverables**
 5. **7.2 Project 2.3: Validating text and codes — nominal data and ordinal numbers**
 6. **7.2.1 Description**
 7. **7.2.2 Approach**
 8. **7.2.3 Deliverables**
 9. **7.3 Project 2.4: Finding reference domains**
 1. **7.3.1 Description**
 2. **7.3.2 Approach**
 3. **7.3.3 Deliverables**
 10. **7.4 Summary**
 11. **7.5 Extras**
 1. **7.5.1 Markdown cells with dates and data source information**
 2. **7.5.2 Presentation materials**
 3. **7.5.3 JupyterBook or Quarto for even more sophisticated output**
9. **Chapter 8: Project 2.5: Schema and Metadata**
 1. **8.1 Description**
 2. **8.2 Approach**
 1. **8.2.1 Define Pydantic classes and emit the JSON Schema**

2. [8.2.2 Define expected data domains in JSON Schema notation](#)
 3. [8.2.3 Use JSON Schema to validate intermediate files](#)
3. [8.3 Deliverables](#)
 1. [8.3.1 Schema acceptance tests](#)
 2. [8.3.2 Extended acceptance testing](#)
4. [8.4 Summary](#)
5. [8.5 Extras](#)
 1. [8.5.1 Revise all previous chapter models to use Pydantic](#)
 2. [8.5.2 Use the ORM layer](#)
10. [Chapter 9: Project 3.1: Data Cleaning Base Application](#)
 1. [9.1 Description](#)
 1. [9.1.1 User experience](#)
 2. [9.1.2 Source data](#)
 3. [9.1.3 Result data](#)
 4. [9.1.4 Conversions and processing](#)
 5. [9.1.5 Error reports](#)
 2. [9.2 Approach](#)
 1. [9.2.1 Model module refactoring](#)
 2. [9.2.2 Pydantic V2 validation](#)
 3. [9.2.3 Validation function design](#)
 4. [9.2.4 Incremental design](#)
 5. [9.2.5 CLI application](#)
 3. [9.3 Deliverables](#)
 1. [9.3.1 Acceptance tests](#)
 2. [9.3.2 Unit tests for the model features](#)
 3. [9.3.3 Application to clean data and create an NDJSON interim file](#)
 4. [9.4 Summary](#)
 5. [9.5 Extras](#)
 1. [9.5.1 Create an output file with rejected samples](#)
11. [Chapter 10: Data Cleaning Features](#)
 1. [10.1 Project 3.2: Validate and convert source fields](#)
 1. [10.1.1 Description](#)
 2. [10.1.2 Approach](#)

3. [10.1.3 Deliverables](#)
2. [10.2 Project 3.3: Validate text fields \(and numeric coded fields\)](#)
 1. [10.2.1 Description](#)
 2. [10.2.2 Approach](#)
 3. [10.2.3 Deliverables](#)
3. [10.3 Project 3.4: Validate references among separate data sources](#)
 1. [10.3.1 Description](#)
 2. [10.3.2 Approach](#)
 3. [10.3.3 Deliverables](#)
4. [10.4 Project 3.5: Standardize data to common codes and ranges](#)
 1. [10.4.1 Description](#)
 2. [10.4.2 Approach](#)
 3. [10.4.3 Deliverables](#)
5. [10.5 Project 3.6: Integration to create an acquisition pipeline](#)
 1. [10.5.1 Description](#)
 2. [10.5.2 Approach](#)
 3. [10.5.3 Deliverables](#)
6. [10.6 Summary](#)
7. [10.7 Extras](#)
 1. [10.7.1 Hypothesis testing](#)
 2. [10.7.2 Rejecting bad data via filtering \(instead of logging\)](#)
 3. [10.7.3 Disjoint subentities](#)
 4. [10.7.4 Create a fan-out cleaning pipeline](#)
12. [Chapter 11: Project 3.7: Interim Data Persistence](#)
 1. [11.1 Description](#)
 2. [11.2 Overall approach](#)
 1. [11.2.1 Designing idempotent operations](#)
 3. [11.3 Deliverables](#)
 1. [11.3.1 Unit test](#)
 2. [11.3.2 Acceptance test](#)
 3. [11.3.3 Cleaned up re-runnable application design](#)
 4. [11.4 Summary](#)

5. **11.5 Extras**
 1. **11.5.1 Using a SQL database**
 2. **11.5.2 Persistence with NoSQL databases**
13. **Chapter 12: Project 3.8: Integrated Data Acquisition Web Service**
 1. **12.1 Description**
 1. **12.1.1 The data series resources**
 2. **12.1.2 Creating data for download**
 2. **12.2 Overall approach**
 1. **12.2.1 OpenAPI 3 specification**
 2. **12.2.2 RESTful API to be queried from a notebook**
 3. **12.2.3 A POST request starts processing**
 4. **12.2.4 The GET request for processing status**
 5. **12.2.5 The GET request for the results**
 6. **12.2.6 Security considerations**
 3. **12.3 Deliverables**
 1. **12.3.1 Acceptance test cases**
 2. **12.3.2 RESTful API app**
 3. **12.3.3 Unit test cases**
 4. **12.4 Summary**
 5. **12.5 Extras**
 1. **12.5.1 Add filtering criteria to the POST request**
 2. **12.5.3 Use Celery instead of concurrent.futures**
 3. **12.5.4 Call external processing directly instead of running a subprocess**
14. **Chapter 13: Project 4.1: Visual Analysis Techniques**
 1. **13.1 Description**
 2. **13.2 Overall approach**
 1. **13.2.1 General notebook organization**
 2. **13.2.2 Python modules for summarizing**
 3. **13.2.3 PyPlot graphics**
 4. **13.2.4 Iteration and evolution**
 3. **13.3 Deliverables**
 1. **13.3.1 Unit test**
 2. **13.3.2 Acceptance test**

4. [13.4 Summary](#)
5. [13.5 Extras](#)
 1. [13.5.1 Use Seaborn for plotting](#)
 2. [13.5.2 Adjust color palettes to emphasize key points about the data](#)
15. [Chapter 14: Project 4.2: Creating Reports](#)
 1. [14.1 Description](#)
 1. [14.1.1 Slide decks and presentations](#)
 2. [14.1.2 Reports](#)
 2. [14.2 Overall approach](#)
 1. [14.2.1 Preparing slides](#)
 2. [14.2.2 Preparing a report](#)
 3. [14.2.3 Creating technical diagrams](#)
 3. [14.3 Deliverables](#)
 4. [14.4 Summary](#)
 5. [14.5 Extras](#)
 1. [14.5.1 Written reports with UML diagrams](#)
16. [Chapter 15: Project 5.1: Modeling Base Application](#)
 1. [15.1 Description](#)
 2. [15.2 Approach](#)
 1. [15.2.1 Designing a summary app](#)
 2. [15.2.2 Describing the distribution](#)
 3. [15.2.3 Use cleaned data model](#)
 4. [15.2.4 Rethink the data inspection functions](#)
 5. [15.2.5 Create new results model](#)
 3. [15.3 Deliverables](#)
 1. [15.3.1 Acceptance testing](#)
 2. [15.3.2 Unit testing](#)
 3. [15.3.3 Application secondary feature](#)
 4. [15.4 Summary](#)
 5. [15.5 Extras](#)
 1. [15.5.1 Measures of shape](#)
 2. [15.5.2 Creating PDF reports](#)
 3. [15.5.3 Serving the HTML report from the data API](#)
17. [Chapter 16: Project 5.2: Simple Multivariate Statistics](#)

1. **16.1 Description**
 1. **16.1.1 Correlation coefficient**
 2. **16.1.2 Linear regression**
 3. **16.1.3 Diagrams**
2. **16.2 Approach**
 1. **16.2.1 Statistical computations**
 2. **16.2.2 Analysis diagrams**
 3. **16.2.3 Including diagrams in the final document**
3. **16.3 Deliverables**
 1. **16.3.1 Acceptance tests**
 2. **16.3.2 Unit tests**
4. **16.4 Summary**
5. **16.5 Extras**
 1. **16.5.1 Use pandas to compute basic statistics**
 2. **16.5.2 Use the dask version of pandas**
 3. **16.5.3 Use numpy for statistics**
 4. **16.5.4 Use scikit-learn for modeling**
 5. **16.5.5 Compute the correlation and regression using functional programming**
18. **Chapter 17: Next Steps**
 1. **17.1 Overall data wrangling**
 2. **17.2 The concept of “decision support”**
 3. **17.3 Concept of metadata and provenance**
 4. **17.4 Next steps toward machine learning**
 5. **Why subscribe?**
