

Part 2: Basic Projects

In this part, you will learn about .NET MAUI features such as Shell, CollectionView, Image, Button, Label, CarouselView, Grid, Custom Controls, and Gestures. You will explore using location services, calling custom web APIs, and designing your XAML for different form factors.

This part has the following chapters:

- ***[Chapter 4](#)***, *Building a News App Using .NET MAUI Shell*
- ***[Chapter 5](#)***, *Building a Matchmaking App with Rich UX Using Animations*
- ***[Chapter 6](#)***, *Building a Photo Gallery App Using CollectionView and CarouselView*
- ***[Chapter 7](#)***, *Building a Location Tracking App Using GPS and Maps*
- ***[Chapter 8](#)***, *Building a Weather App for Multiple Form Factors*
