

CONTENTS IN DETAIL

[Acknowledgments](#)

[Introduction](#)

[Who Is This Book For?](#)

[What's in This Book?](#)

[What's New to the Second Edition?](#)

[Why Python?](#)

[The Code in This Book](#)

[Part I: Warming Up](#)

[1 The Koch Snowflake](#)

[How It Works](#)

[Using Recursion](#)

[Computing the Snowflake](#)

[Drawing with turtle Graphics](#)

[Requirements](#)

[The Code](#)

Calculating the Points

Recurring

Drawing a Flake

Writing the main() Function

Running the Snowflake Code

Summary

Experiments!

The Complete Code

2 Spirographs

How It Works

Understanding Parametric Equations

Drawing Curves with turtle Graphics

Requirements

The Code

Drawing the Spiros

Coordinating the Animation

Saving the Curves

Parsing Command Line Arguments and Initialization

Running the Spirograph Animation

Summary

Experiments!

The Complete Code

Part II: Simulating Life

3 Conway's Game of Life

How It Works

Requirements

The Code

Representing the Grid

Setting the Initial Conditions

Enforcing the Boundary Conditions

Implementing the Rules

Sending Command Line Arguments to the Program

Initializing the Simulation

Running the Game of Life Simulation

Summary

Experiments!

The Complete Code

4 Musical Overtones with Karplus-Strong

[How It Works](#)

[The Simulation](#)

[The WAV File Format](#)

[The Minor Pentatonic Scale](#)

[Requirements](#)

[The Code](#)

[Implementing the Ring Buffer with deque](#)

[Implementing the Karplus-Strong Algorithm](#)

[Writing a WAV File](#)

[Playing WAV Files with pyaudio](#)

[Creating Notes and Parsing Arguments](#)

[Running the Plucked String Simulation](#)

[Summary](#)

[Experiments!](#)

[The Complete Code](#)

[5 Flocking Boids](#)

[How It Works](#)

[Requirements](#)

[The Code](#)

Initializing the Simulation

Setting Boundary Conditions

Drawing a Boid

Applying the Rules of the Boids

Influencing the Simulation

Incrementing the Simulation

Parsing Arguments and Instantiating the Boids

Running the Boids Simulation

Summary

Experiments!

The Complete Code

Part III: Fun with Images

6 ASCII Art

How It Works

Requirements

The Code

Defining the Grayscale Levels and Grid

Computing the Average Brightness

Generating the ASCII Content from the Image

Creating Command Line Options

Writing the ASCII Art Strings to a Text File

Running the ASCII Art Generator

Summary

Experiments!

The Complete Code

7 Photomosaics

How It Works

Splitting the Target Image

Averaging Color Values

Matching Images

Requirements

The Code

Reading In the Input Images

Calculating the Average Color Value of an Image

Splitting the Target Image into a Grid

Finding the Best Match for a Tile

Creating an Image Grid

Creating the Photomosaic

[Writing the main\(\) Function](#)

[Running the Photomosaic Generator](#)

[Summary](#)

[Experiments!](#)

[The Complete Code](#)

[8 Autostereograms](#)

[How It Works](#)

[Perceiving Depth in an Autostereogram](#)

[Working with Depth Maps](#)

[Shifting Pixels](#)

[Requirements](#)

[The Code](#)

[Creating a Tile from Random Circles](#)

[Repeating a Given Tile](#)

[Creating Autostereograms](#)

[Providing Command Line Options](#)

[Running the Autostereogram Generator](#)

[Summary](#)

[Experiments!](#)

The Complete Code

Part IV: Enter 3D

9 Understanding OpenGL

How OpenGL Works

Geometric Primitives

3D Transformations

Shaders

Vertex Buffers

Texture Mapping

The OpenGL Context

Requirements

The Code

The RenderWindow Class

The Scene Class

Utility Functions

Running the OpenGL Application

Summary

Experiments!

The Complete Code

10 Conway's Game of Life on a Torus

How It Works

Computing Vertices

Computing Normals for Lighting

Rendering

Coloring the Triangle Strips

Controlling the Camera

Mapping the Grid to the Torus

Requirements

The Code

Rendering the Torus

Implementing the Game of Life Simulation

Creating the Camera

Putting Everything Together

Running the 3D Game of Life Simulation

Summary

Experiments!

The Complete Torus Rendering Code

The Complete Game of Life Simulation Code

[The Complete Camera Code](#)

[The Complete RenderWindow Code](#)

[11 Volume Rendering](#)

[How It Works](#)

[The Data Format](#)

[Ray Generation](#)

[The OpenGL Window](#)

[Requirements](#)

[The Code](#)

[Generating a 3D Texture](#)

[Generating Rays](#)

[Implementing the Ray Casting Algorithm](#)

[Showing 2D Slices](#)

[Putting the Code Together](#)

[Running the Program](#)

[Summary](#)

[Experiments!](#)

[The Complete 3D Texture Code](#)

[The Complete Ray Generation Code](#)

[The Complete Volume Ray Casting Code](#)

[The Complete 2D Slicing Code](#)

[The Complete Main File Code](#)

[Part V: Hardware Hacking](#)

[12 Karplus-Strong on a Raspberry Pi Pico](#)

[How It Works](#)

[Input and Output](#)

[The I2S Protocol](#)

[Requirements](#)

[Hardware Setup](#)

[MicroPython Setup](#)

[The Code](#)

[Setting Up](#)

[Generating the Notes](#)

[Playing a Note](#)

[Writing the main\(\) Function](#)

[Running the Pico Code](#)

[Summary](#)

[Experiments!](#)

The Complete Code

13 Laser Audio Display with a Raspberry Pi

How It Works

Generating Patterns with a Laser

Analyzing Audio with the Fast Fourier Transform

Requirements

Setting Up the Raspberry Pi

Constructing the Laser Display

Hooking Up the Hardware

The Code

Setting Up

Controlling the Hardware

Processing the Audio

Testing the Motors

Putting It All Together

Running the Laser Display

Summary

Experiments!

The Complete Code

14 IoT Garden

How It Works

Bluetooth Low Energy

The Bottle Web Framework

The SQLite Database

Requirements

Raspberry Pi Setup

CircuitPython Setup

If This Then That Setup

The Code

The CircuitPython Code

The BLE Scanner Code

The Web Server Code

The Main Program File

Running the IoT Garden

Summary

Experiments!

The Complete CircuitPython Code

The Complete BLE Scanner Code

[The Complete Python Web Server Code](#)

[The Complete Main Program Code](#)

[15 Audio ML on Pi](#)

[A Machine Learning Overview](#)

[How It Works](#)

[Spectrograms](#)

[Inference on the Raspberry Pi](#)

[Requirements](#)

[The Code](#)

[Training the Model in Google Colab](#)

[Using the Model on the Raspberry Pi](#)

[Running the Speech Recognition System](#)

[Summary](#)

[Experiments!](#)

[The Complete Code](#)

[A Python Installation](#)

[Installing Source Code for the Book's Projects](#)

[Installing Python and Python Modules](#)

[Windows](#)

macOS

Linux

B Raspberry Pi Setup

Setting Up the Software

Testing Your Connection

Logging in to Your Pi with SSH

Installing Python Modules

Working Remotely with Visual Studio Code

Index
