

BRIEF CONTENTS

[Acknowledgments](#)

[Introduction](#)

[Part I: Warming Up](#)

[Chapter 1: The Koch Snowflake](#)

[Draw a beautiful fractal pattern](#)

[Chapter 2: Spirographs](#)

[Animate spirograph-like curves](#)

[Part II: Simulating Life](#)

[Chapter 3: Conway's Game of Life](#)

[Implement a cellular automaton](#)

[Chapter 4: Musical Overtones with Karplus-Strong](#)

[Synthesize realistic plucked string sounds](#)

[Chapter 5: Flocking Boids](#)

[Simulate the behavior of a flock of birds](#)

[Part III: Fun With Images](#)

Chapter 6: ASCII Art

Convert images into text-based art

Chapter 7: Photomosaics

Reproduce an image from a grid of smaller images

Chapter 8: Autostereograms

Embed a 3D image in a 2D pattern

Part IV: Enter 3D

Chapter 9: Understanding OpenGL

Explore the basics of 3D graphics and shaders

Chapter 10: Conway's Game of Life on a Torus

Run a cellular automaton in 3D

Chapter 11: Volume Rendering

Visualize MRI and CT scan data

Part V: Hardware Hacking

Chapter 12: Karplus-Strong on a Raspberry Pi Pico

Build a playable electronic instrument

Chapter 13: Laser Audio Display with a Raspberry Pi

Design a laser light show that responds to music

Chapter 14: IoT Garden

Monitor the state of a garden over Bluetooth

Chapter 15: Audio ML on Pi

Train and deploy an embedded speech recognition system

Appendix A: Python Installation

Set up Anaconda Python with all the required modules

Appendix B: Raspberry Pi Setup

Learn to work with your Pi

Index
